Just the natural look of cedar staves and marine grade stainless steel, fashioned into a wooden barrel using the time honoured ancient art of cooperage.

Our hot tubs are made for admiration.... of the exquisite beauty of our heart wood cedar (each 1 3/4 inch thick stave is milled to precision with an interlocking tongue and groove profile)... of the delightful interplay of our premium wooden staves.

Our hot tubs are made for relaxation and is the perfect social setting.

Octagonal wooden bench hung off the walls for maximum leg room to seat from one to six, in the ultimate backyard setting.

And our exclusive 6"-4" tapered insulating cover is the thickest and most insulating in the industry.

Unlike a spa, our hot tubs look more natural as time passes.

Nothing beats deep soaking in a wooden tub !

Just take one look... it's worth more than a thousand words. Enough said.

Features hand crafted in USA, **clear all heart, vertical grain Canadian Western Red Cedar**, 1 3/4 inch net thick staves (optional upgrade to 2 1/8 inch), **tongue and groove joints**, octagonal wall hung bench seat, **Stainless steel bands**, 5ft diameter, **Thickest, most insulating cover in the industry**

Nothing beats the look, smell and feel of a genuine Poynters hand-crafted Western Red Cedar hot tub, that ages beautifully over time. A truly well constructed Cedar Barrel Hot Tub made from premium materials.

Our tubs are built using traditional cooperage techniques, but they also have unique design qualities that set them apart from other tubs :

Finest clear heart, vertical grain Western Red Cedar timber in the industry !

Tongue and groove interlocking staves with a smooth inner surface which makes cleaning easy !

Round stainless steel bands are attractive and reduce timber dampness.

Wall hung bench seat for maximum leg room and ease of cleaning.

Thickest, most insulating cover in the industry.

Choice of 1 3/4" thick staves (standard)

or 2 1/8" thick staves (premium) for colder climates.

relaxation

Can a spa look this good ?

This tradition has survived the passage of time due to it's exquisite beauty and longevity

INSTALLATION REQUIREMENTS

The tub must be sited on a flat re-inforced concrete pad at least 10cm thick or a suitably reinforced deck.

In-ground installations require the tub be recessed in to a free-draining pit. Access must be made for tub servicing.

Provide for a typical power supply of 15 amps.
